

Young Investigator Grant for **Probiotics Research**

The program has two research grants for 2019 which support new research on probiotics and gastrointestinal microbiota in the United States. Young investigators committed to basic research on gastrointestinal microbiota, probiotics and their role in health and wellness should apply. Grant will start on July 1, 2019.

\$50,000

Application deadline

March 6, 2019

**DANONE
NUTRICIA
RESEARCH**

Yakult

The grants will be awarded at the sole discretion of the Independent Selection Committee.

The mission of **DANONE NUTRICIA RESEARCH** is to bring health through food to as many people as possible. It is the world's leading producer of yogurt products, sold under the DANNON and DANONE brand names. Over the past 90 years, DANONE NUTRICIA RESEARCH has built a vast 'culture collection' of bacteria strains that provide the basis for product innovation. Sound scientific research is the cornerstone of DANONE NUTRICIA RESEARCH's focus on the health benefits of probiotics in food.

The **Global Probiotics Council** is a committee established in 2004 by DANONE NUTRICIA RESEARCH and YAKULT HONSHA CO., LTD., to promote and/or advance the field of probiotics in the world.

YAKULT HONSHA CO., LTD. contributes to the health and happiness of people around the world through the pursuit of excellence in the life sciences and research on microorganisms. For over 80 years, Yakult has promoted a deep and widespread understanding of probiotics. Today, over 39 million bottles of Yakult's signature probiotic drink are consumed daily in 38 countries and regions, including the United States.
